DEPARTMENT OF GENETICS

Professor Joshua Lederberg

March 19, 1969

Dear Helen:

I am sorry I was so elliptical about "Dronamraju"; I meant that the pages were copied from the book he edited ("Haldane and Modern Biology").

It would be gratifying to come to closure on re-printing arrangements. So to try to re-gather the threads, I have sent the enclosed to Mr. Aronson, and trust he will be writing you directly about any necessary ~~form~~ formalities.

No paperbacks have come to my attention, but I will look out for them. The only other recent work about Haldane that I do know of is a selection "Science and Life", a set of essays originally published in the Rationalist Annual (and evidently copyrighted by the Rationalist Assn.,) and published by Pemberton, London. Maynard Smith wrote an introduction.

Thank you for your good wishes about Marguerite and David. Yes, all is very well there.

All the best to you,

*Joshua.*
